Personal Summary

Dynamic Software Engineer with a proven track record at Bodsphere, specializing in React.js development and API integration. Achieved a 30% improvement in load times while enhancing user experience through innovative UI design and performance optimization. Adept at problem-solving and collaborating with cross-functional teams to drive engagement and functionality.

Skills

- React.js development
- API integration
- Cross-browser compatibility
- Performance optimization
- UI design principles
- User experience enhancement
- Problem solving
- JavaScript ES6 features

Experience

- 02/2025 - Current
Bodsphere
Noida, India
Software Engineer
 - Developed and maintained highly interactive React.js applications, improving load times by 30% through optimized rendering and lazy loading.
 - Built an audiobook module allowing users to read and listen simultaneously, with synchronized playback and seamless transitions.
 - Implemented a custom video/audio player integrated with the YouTube API, fetching and streaming more than 15 audio files smoothly, with adaptive performance.
 - Integrated Firebase for authentication, real-time updates, and data storage, along with social logins and payment gateway APIs (Google, Facebook, Apple).
 - Designed and developed modern UI components using Tailwind CSS, Framer Motion, and Lottie animations, ensuring a clean, responsive, and engaging interface.
 - Collaborated with UI/UX and backend teams to build chat, review, and booking modules, enhancing overall app performance and user engagement.
 - Improved navigation flow and responsiveness, ensuring a smooth and consistent user experience across all devices.
- 12/2023 - 01/2025
Hiyaak Systems Technologies
Private Limited
Bangalore, India
Software Engineer
 - Developed web applications with React.js, improving load times by 34%.
 - Collaborated with UI/UX and back-end teams to elevate user engagement by 15%.
 - Integrated third-party APIs, including payment gateways and social media logins seamlessly.
 - Streamlined cross-browser compatibility processes, resolving issues in over 90% of browsers.
 - Conducted code reviews, reducing latency by 25% across web functions.
 - Developed new features using OpenAI.

Education

- 07/2023
Chikmagalur, India
Bachelor of Engineering in Computer Science
Adichunchanagiri Institute of Technology

LANGUAGES

English: Advanced, Kannada: Native

PROJECTS

- Bodsphere Web Application: Developed a yoga video streaming web application for Bodsphere that allows users to watch guided yoga sessions, track their progress, and access interactive lessons with smooth playback, responsive design, and an engaging user experience
- Razzmatazz: Developed the Razzmatazz e-commerce web platform that enables users to browse, order, and review food items seamlessly, featuring dynamic restaurant listings, a responsive UI, secure API integrations, and a smooth, app-like user experience
- Scratch and Win: Developed a Scratch and Win web application that allows users to play interactive reward games, track winnings, and engage with a dynamic, responsive interface featuring smooth animations and real-time updates
- Soulipie developed Solipie, a dating web application that enables users to create profiles, match with others, and interact through messaging, featuring a responsive UI, smooth navigation, and secure user authentication

Key Achievements

- Achieved a 25% reduction in load times: Implemented a comprehensive optimization strategy, resulting in a 25% decrease in web application load times during peak usage periods.
- Increased user engagement by 30%: Developed and launched a new feature set that directly contributed to a 30% increase in user engagement statistics.
- Refined system architecture: Led a cross-functional team by refining architecture, improving overall system reliability by 20%.
